

I recently learned of an issue that may affect
my ability to receive an important radio station
to me and my family. K-Love a radio station that
I listen to no matter what part of the country
am in, is about to be in jeopardy if FM translators
are to be replaced with LPFM. As I am sure you can
appreciate, music is a big part of most of our lives
and it would certainly be a tragedy if myself and
other local listeners were not able to receive the sounds
that have been enriching their lives for years.
Familiarity is a necessary part of our lives and the familiar family folks at K-
Love would surely be missed. Please
don't allow stations like K-Love and others to be removed
from the air with this new proposal.
